Applicant argues the McDuff "does not teach or suggest logic configured to determine an operator efficiency parameter by integrating the set of switching statistics with the set of work statistics." Examine maintains that when you combine the one of ordinary skill in the art with McDuff's (1) gathering statistics regarding agent calling activity, (2) statistics gathered include average handling time, average work time, average talk time, etc. and (3) the statistics are used to generate reports useful to a supervisor or other manager can be used to generate an operator's efficiency parameter.
